

Due to the Covid-19 virus pandemic and its unknown life cycle. Rapid Removal is following the national response set forth by the big national waste haulers in the U.S.A.

These haulers are suspending weekly bulky item pickup and the cleanups due

to the virus ability to live on the surface of the items. Suspending these two services minimizes the virus exposure to the sanitation workers, which could result in all weekly trash service being affected.

In addition to the above two changes. All waste companies have implemented the following:

- All trash must be bagged.
- Limit of 15 (13 gallon) bags.
- If residents have trash bins, it is preferred that trash inside the bins be bagged.
- No debris or items outside of the trash bins or bags will be picked up.
- Workers will not come into close contact/proximity with residents while on the route.
- Maintaining weekly trash service takes priority over all special requests.

If a customer has a bulky item up to 150 pounds (ie sofa, chairs, stoves, fridge, etc.), the customer can bring that item to Rapid Removal's facility without a charge as long as they bring ID and a TMU utility bill showing that they pay for trash service inside the City of Trenton. If more than one item or if a trailer or pickup truck load of items is brought to Rapid Removal, a charge will apply. Please contact Rapid Removal ahead of time at **660-654-4287** before dropping off items.
